## Activity Diagram :-

Discription :- The Owner will start the activity from registration . New owner to the system will Sign up

and old owner have to login to system for performing further task. After that either Owner will go for parts searching or for revenue calculation. In searching process if the parts are not available then system will reverse back and if parts found then system will display parts with rack no in which the parts have kept. The system will update itself and if the amount reaches to threshold point the system will inform. And he will have to order that parts and then he will logout from the system.
